

INFOCARD 2: AUTOMATED GATEHOUSE

Automated on-site Booking and Log-in system delivering substantial, ongoing savings and rapid Return on Investment

Our automated access control systems aligns Health & Safety, efficient traffic management, site access and one view of the logistics activity on site at any point in time. It manages the end-to-end flow of vehicle, driver and load, and provides accuracy of data acquisition.

- » Enables a smooth flow of traffic and a heightened level of safety, security and site management
- » Example annual single site saving of colleague hours c£96,000, and typical ROI for large operators only 8 months
- » Now in use across 50+ large scale UK facilities

- Simple, easy to follow touchscreen display with multi-lingual options
- Clear communication with an integrated two way voice control system
- ANPR tracking provides transport recognition and guidance/control
- Fully integrates into existing access control systems and networks for seamless operation

Liquid nano anti-bacterial coating on touchscreens

Automated access control systems

Despatch lockers for driver's keys and trip details

Self check-in & information terminals

Automated container number reading systems

Secure dispensing of equipment

24/7/365 food & drink vending and automated cafe

INFOCARD 6: CONTAINER NUMBER READING SYSTEM

Improving accuracy and operational efficiencies by eliminating human error

We have developed a solution that automatically detects and records the VRN, trailer number and container number of vehicles at the entrance and exit gates and use this to maintain a list of assets currently on site.

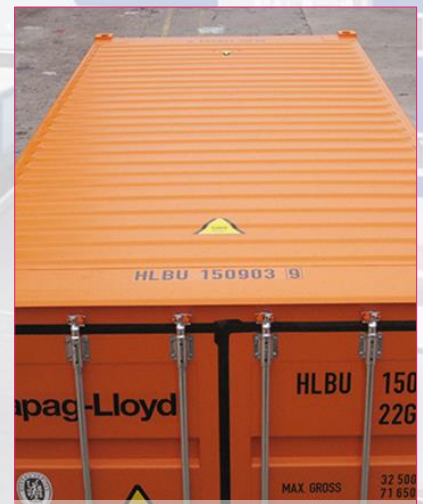

- » Efficient and accurate data capture, reducing costs
- » Full reporting suite to help manage the flow of containers in real time
- » Software to support container stack movement and prioritisation, to maximise efficient lifts
- » An enabler to introduce our full gatehouse automation solution
